STORViX™

Our Solution

Experience a unified approach to managing the data lifecycle, all in **one** platform.

Meet AiRE IntelligentFiler

AiRE IntelligentFiler is a self-driving storage solution that stands out for its ability to learn, tailor and adapt to meet your specific needs. The technology behind AiRE is inspired by cognitive science and biological systems such as DNA, nature's highly efficient data storage system, encapsulating vast genetic information. This innovative approach shapes how data is considered, stored, treated, and managed. AiRE ensures a seamless user experience across all platforms and solutions, whether in the cloud or on-premises, for primary storage or archival backup – all accessible through a single unified user interface. Prioritizing ease of use, AiRE gets up and running within minutes after powering on a unit, eliminating the need for manual configuration.

Save **+50%** resources

Save **+80%** time

Save **+40%** energy

What does AiRE do?

Data Protection

- Resiliency & Security
- Geographically separated backups
- Instant recovery from snapshots
- Robust Access Controls
- Industrial-Strength Encryption

Data Storage

- Effortless Scalability
- Modular & Adaptive Architecture
- Flexible Pricing
- Eco-efficiency

Data management

- Seamless User Experience
- Unified Diverse Protocols
- Single Interface for Clouds and Units

STORViX™

One Experience, Multiple Environments:
Aire's Seamless UX

Get AiRE on-premises
Set it up the way you want

Set it up the way you want Have control over data security and location including full access to the operating environment with our modular hardware.
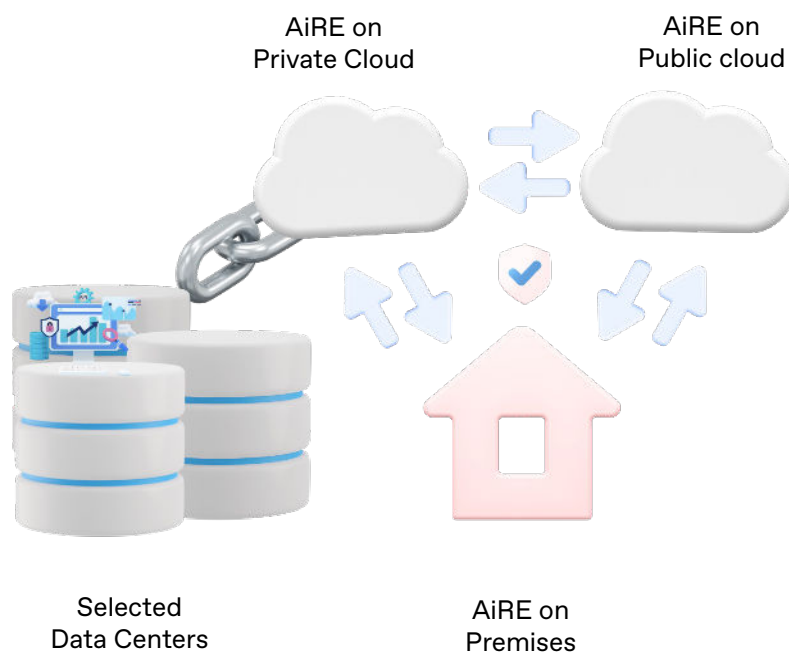

Get AiRE as a service
Enjoy it without the TCO

Leverage AiRE without having to maintain the underlying infrastructure. Scale instantly with a pay-as-you-grow model.

Get AiRE in the cloud
Mastering the Multi-Cloud

Access and transfer data between public and/or private clouds via AiRE installations, everything for one simple monthly subscription.
